Wellhead

Used for definitive or temporary closure of biogas wells created by drilling or progressive growth during the landfill exploitation stages. Captures, regulates and transfers biogas from landfill.

Features:

- Body in high density polyethylene (HDPE) or steel (galvanized/stainless)
- Throttle adjustment valve with control lever
- Upper flange in Al, HDPE or steel, suitable for fitting air-operated pumps
- Manual control socket
- Connection to capture probe through a joint with seal gasket or a welded joint
- Connection to the mains network by a welded joint or flexible coupling;
- Body diameter (D), outlet diameter (d) and minimum length (Min) - variable depending on model
- Possibility of implementing well-heads with different diameters and sizes.
